Objective

Computer Engineering student with strong foundation in JavaScript, React.js, and full-stack web development. Experienced in building responsive web applications using modern frontend and backend technologies, with hands-on experience in REST APIs, Git, and scalable application development. Passionate about writing clean, efficient code and solving real-world problems through software engineering.

Experience

- **SAC,ISRO,Ahmedabad** 05/24 - 07/24
Intern
 - noise filtering using Statistical Outlier Removal (SOR) and Radius Outlier Removal techniques.
 - Completed an 11-week technical internship at SAC, ISRO, focusing on LiDAR data preprocessing and automation.
 - Designed and implemented a Python-based noise filtering pipeline using Statistical Outlier Removal (SOR) and Radius Outlier Removal algorithms.
 - Optimized data handling and processing workflows to enhance the accuracy and computational efficiency of LiDAR spatial datasets.
 - Applied algorithmic thinking to solve real-time data noise issues in large-scale 3D point clouds.
 - Diagnosed and resolved technical issues in LiDAR data processing workflows, improving processing reliability and reducing manual intervention.
 - Applied structured problem-solving to resolve real-time technical challenges
 - Automated processes using Python scripting to improve efficiency
 - Worked in a collaborative environment handling technical issues and system improvements

Education

- **LDRP-Institute Of Technology And Research** 2022-2026(Expected)
B.E.(Computer Engineering)
CGPA-7.69

Skills

- Languages: C/C++,Python,Javascript,SQL,HTML/CSS
- Front end: HTML5, CSS3, JavaScript(ES6+), Tailwind CSS, Firebase
- Backend: Node.js, Express.js, REST APIs
- Databases: MongoDB, PostgreSQL
- Tools & Technologies: Git, GitHub, Docker,VS Code
- Coursework: Data Structures & Algorithms, DBMS, OS, CN
- Soft Skills:Communication, Customer Focus, Problem Solving, Adaptability, Team Collaboration

Projects

- **Inventory Management System**
Tech Stack: React.js, Node.js, Express.js, MongoDB, Firebase
 - Developed a responsive full-stack inventory management web application using React.js and Node.js.

- Implemented CRUD operations and REST APIs for inventory and user management.
- Added Firebase authentication and role-based authorization for secure access control.
- Designed responsive UI components for monitoring inventory data across devices.
- Integrated MongoDB for efficient data storage and retrieval.
- Used Git and GitHub for version control and project management.

Achievements & Certifications

- Udemy-Web Development Bootcamp
- NPTEL-Python For Data Science
- Runner Up Mission Chandra(conducted by ISRO& Govt. Of Gujarat)
